WORLDWIDE PARTNER NETWORK

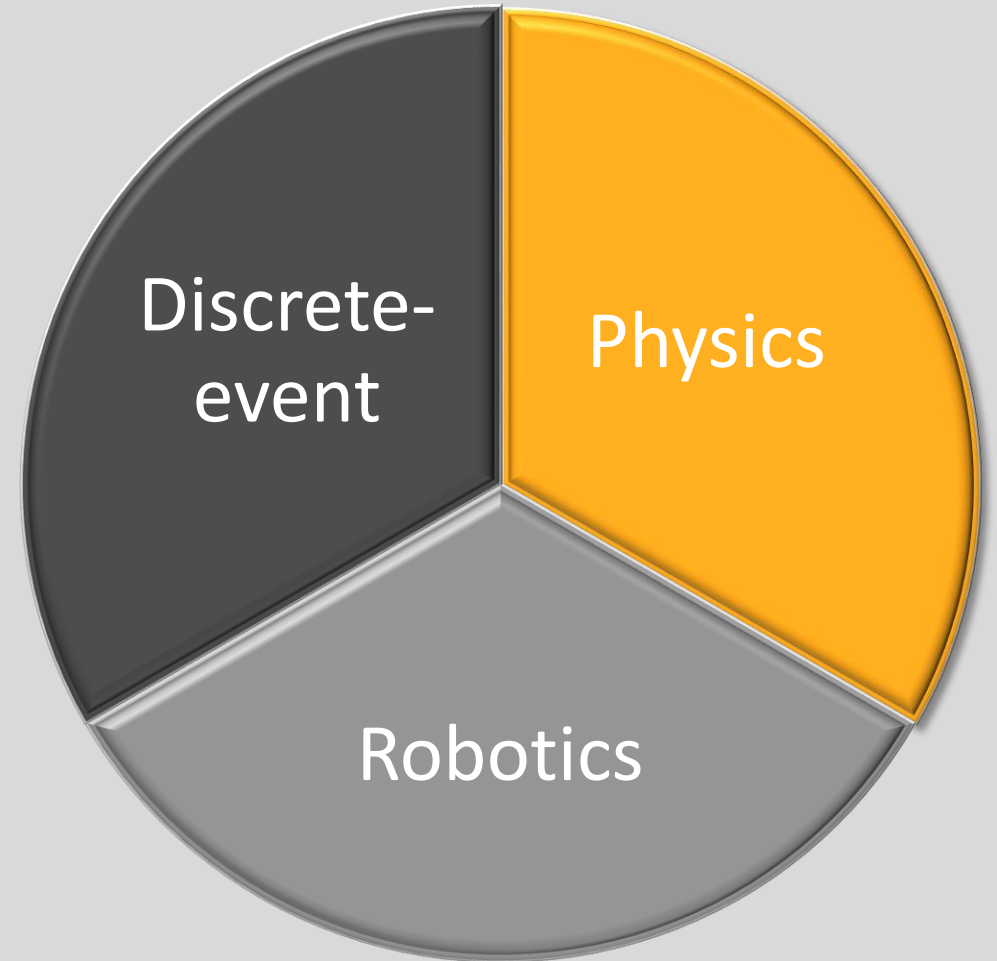

3D SIMULATION FOR EVERYONE | OPEN SOFTWARE PLATFORM

VISUAL COMPONENTS 4.0

VISUAL COMPONENTS SOFTWARE PLATFORM

- Powerful simulation engine supports:
 - Discrete-event for material flow simulation
 - Robotics simulation
 - Physics (Rigid-body) for realistic cable and conveyor simulations
- Open API through .NET and Python

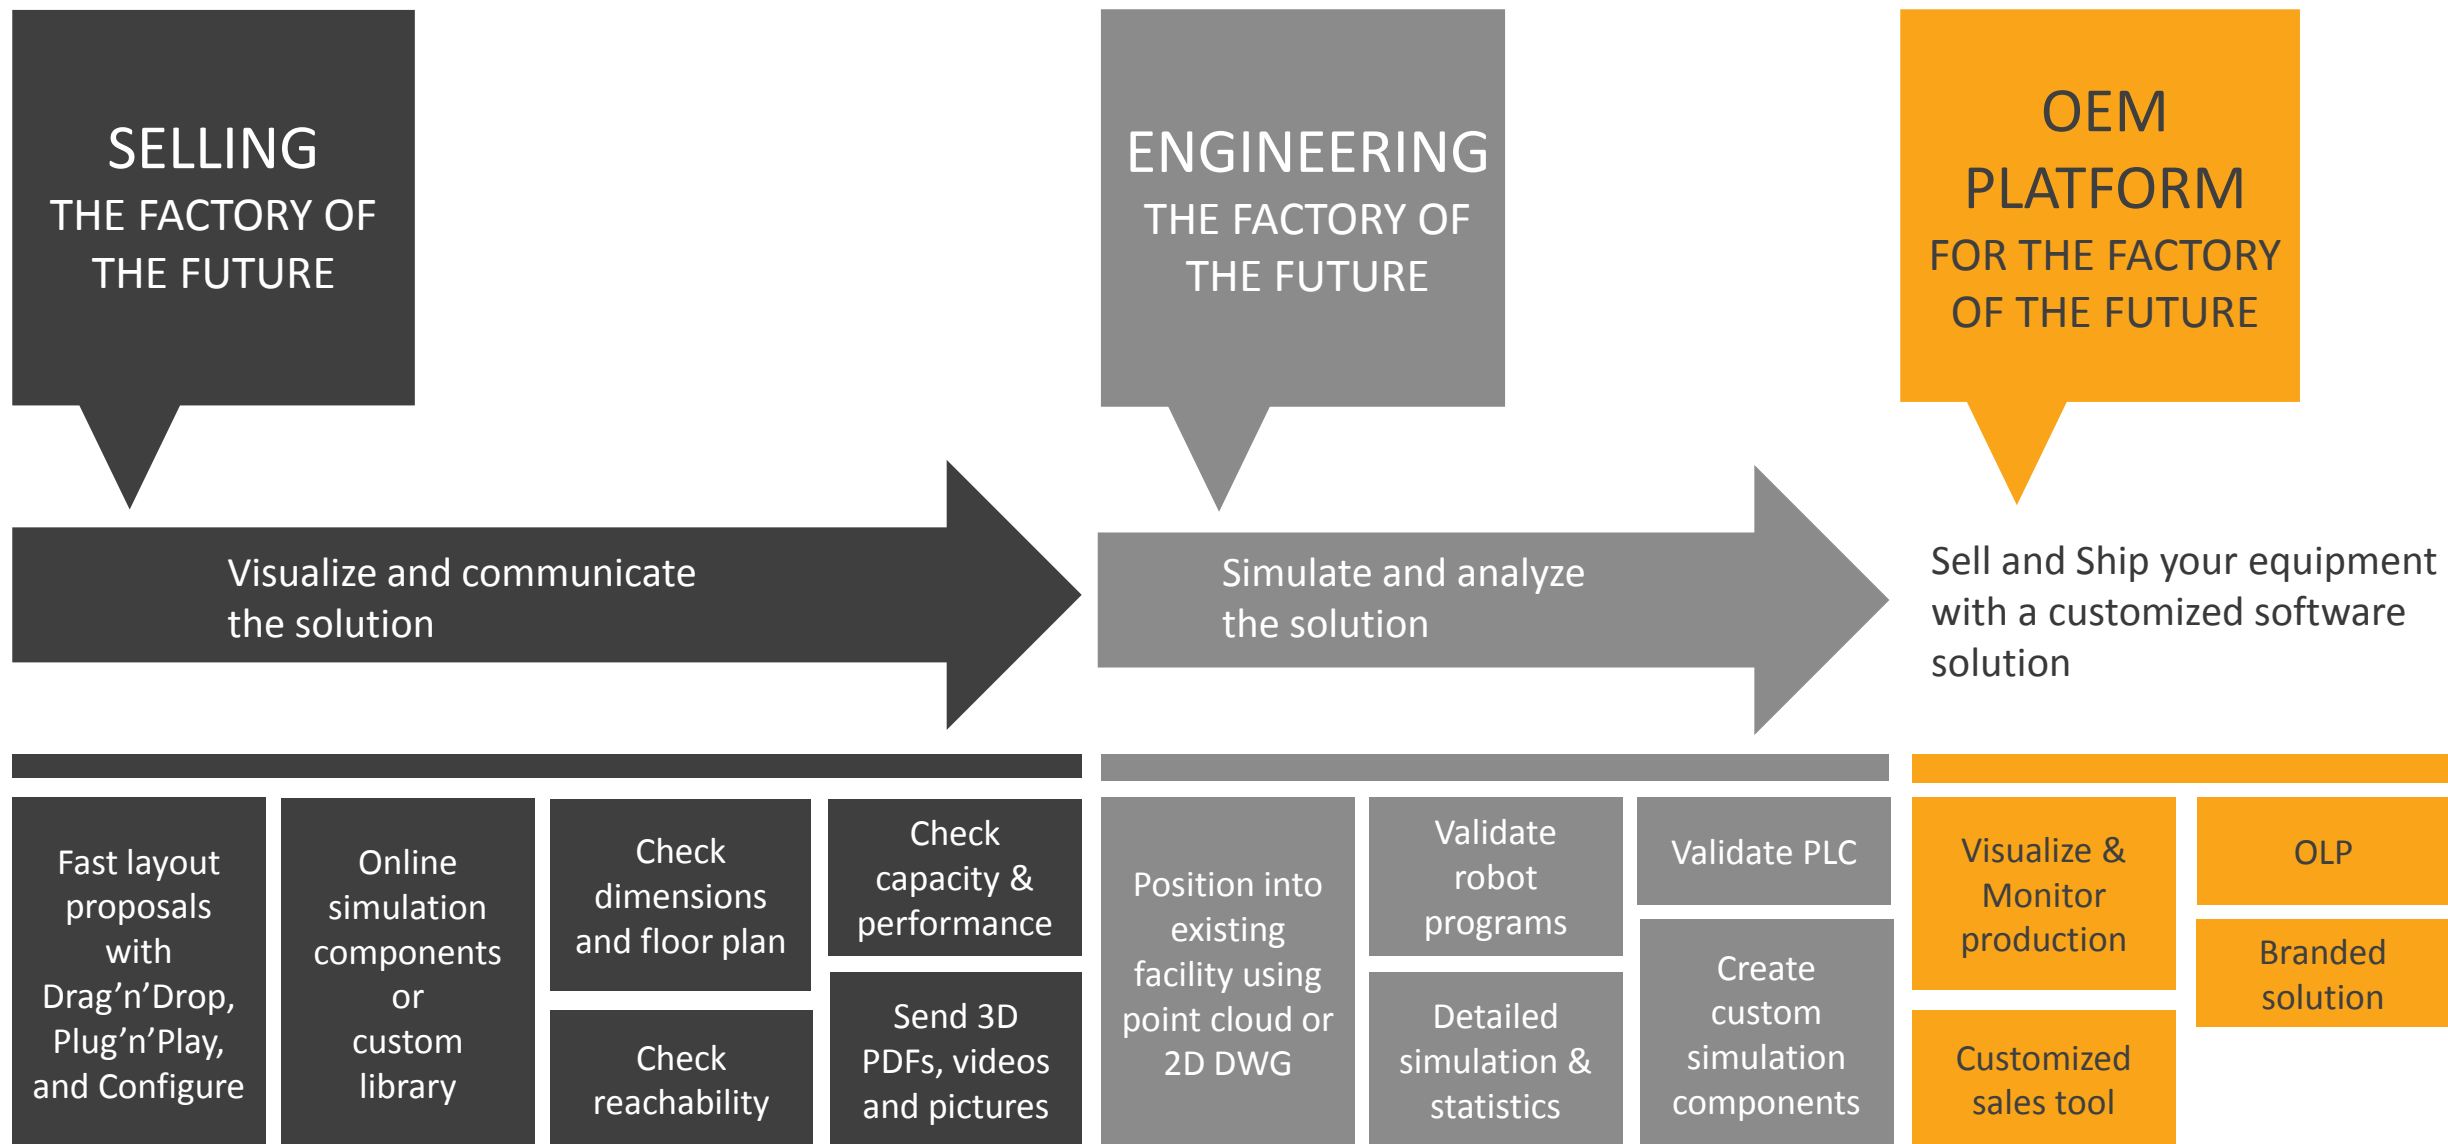

WHY 3DSIMULATION?

COMMON PROBLEMS IN FACTORY DESIGN

- Many layout alternatives
- Tools require expert resources
- Results are too technical and not very representative
- Hard to convince the decision makers

DESIGN THE FACTORIES OF THE FUTURE

BENEFITS IN MANUFACTURING

- Optimized layout, process, and productivity
- Tests with real production lists, peak production, and machine failures
- Reporting of process steps and KPIs
